

Literatuuronderzoek

Om een idee te krijgen van wat er bekend is over goede samenwerking tussen huisarts en wijkverpleging is een systematisch literatuuronderzoek gedaan waarin is gezocht naar empirisch onderzoek over samenwerkingsverbanden tussen huisartsen en wijkverpleging.

Welke speciale initiatieven zijn beschreven in de onderzoeksliteratuur en welke effecten hebben zij op de zorg?

We hebben ons daarbij niet alleen gericht op palliatieve zorg, omdat mogelijk buiten de palliatieve zorg ook goede voorbeelden van initiatieven tot samenwerking zijn beschreven. Hiervoor is de volgende zoekstrategie gebruikt:
